

Cal OES Daily Situation Report

December 18, 2016

The California Highway Patrol placed orders for more than 580 Dodge Charger Pursuit police sedans to replace aging vehicles in its fleet. The vehicles will be delivered over the next two years with the vast majority of the vehicles being delivered next year.

- None reported

WEATHER OF CONCERN

Weather of Concern

- Colder temperatures are expected again Monday morning with widespread freezing temperatures across the northern and central valleys.
- Gusty Santa Ana winds will develop Sunday morning and continue through at least late Monday. The strongest gusts will likely occur Sunday and Monday mornings into the early afternoon. The Los Angeles and Ventura County mountains, including the Santa Monica range, will experience wind gusts of 40 to 50 mph.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER SYNOPSIS BY REGION

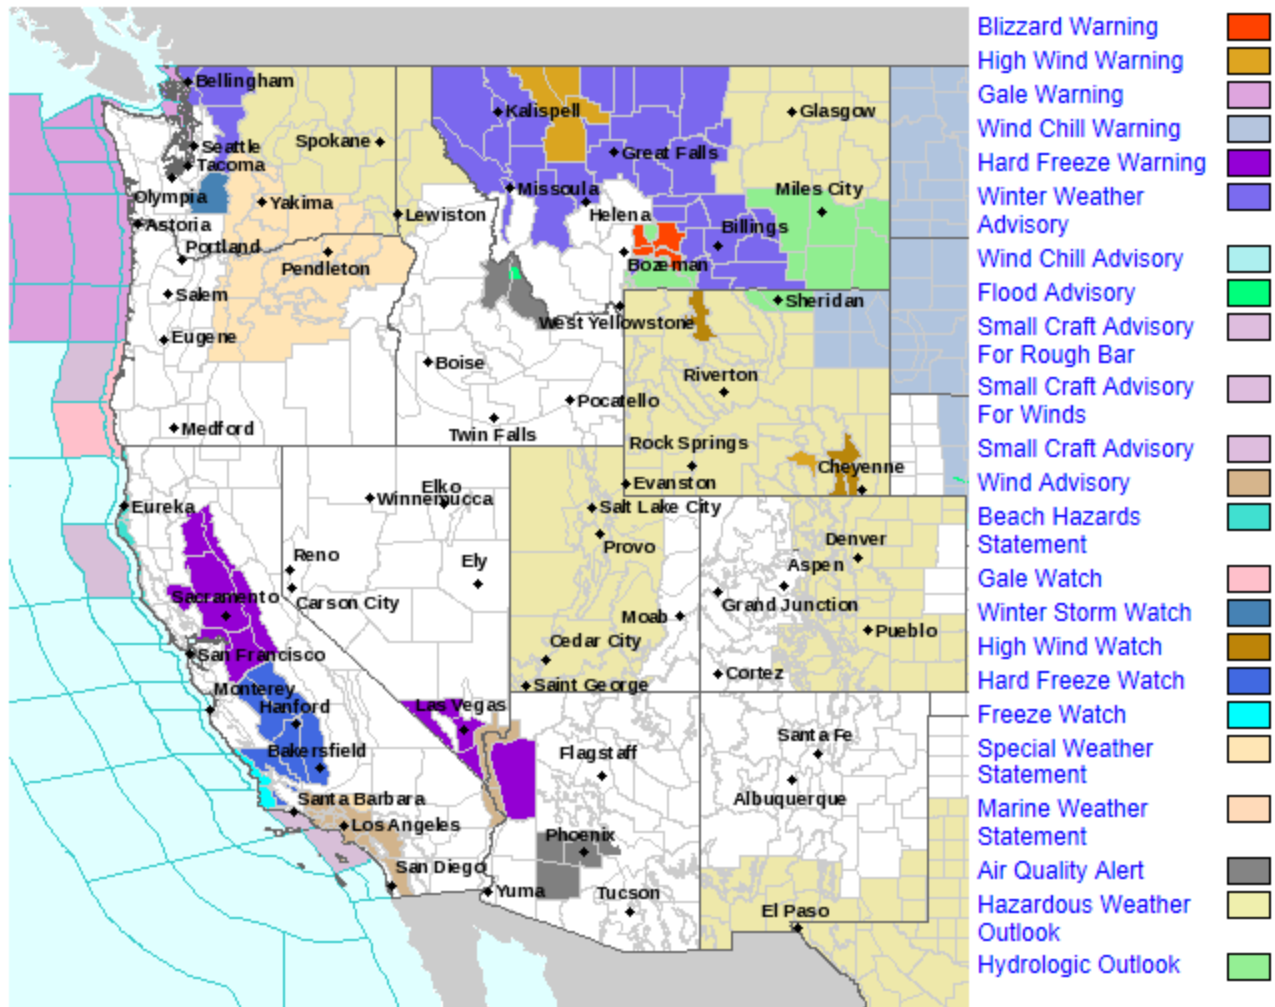

NORTHERN CALIFORNIA

Freezing temperatures in the valley this weekend with dry conditions. Mainly dry next week except for a chance of light showers during mid week. Dry northerly flow continues across northern California this morning, with high pressure aloft over the eastern Pacific. Light winds and clear skies can be found across much of the region, allowing for optimal radiational cooling. Temperatures as of this writing are at or below freezing across much of the valley. A northerly breeze has kept temperatures more moderated along the far northern valley.

SOUTHERN CALIFORNIA

Very cold conditions have moved into a good portion of the forecast area this morning. The combination of an already cooler air mass moving into the region, light winds in wind protected areas and dry air has allowed temperatures to plummet this morning. That being said, this will be a tricky forecast this morning. Looking at the 24-hour trends with temps, most wind protected areas are much colder than yesterday at this time. However, where offshore winds are already developing, the air is able to by mixed and some mountain and wind prone valley locations are actually a few degrees warmer than yesterday. Unusually cold night time temperatures will continue through tonight with widespread frost and freeze conditions. A moderate Santa Ana wind event and a weak ridge of high pressure will bring sunny skies and gradual warming through early this upcoming week. A trough of low pressure may bring a return to cooler conditions and increasing cloudiness later in the week. Showers are possible early the following week.
